Programme

Living Music: The Power in Learning

The musical journey which teachers share with their students often embraces a whole range of life experiences; our understanding of music is inextricably linked to our understanding of human emotion. But contact time between teacher and student is limited. Sometimes, students are taught through passive absorption rather than by stimulation. Quite often, this can lead to students lacking motivation or enjoyment, or even abandoning their studies at an early stage. How can we engage students more actively in the processes of what and how they learn from the very beginning, so that they become independent learners, tapping into their inherent musicality and enabling them to develop their identities as cognitive assessors and musical thinkers? This seminar will explore a range of musical approaches, ideas and insights to help students along this powerful learning path.

09.30 > Registration & Refreshments

09.50 > Welcome & Introduction

Peter Wild, Warden, ISM Private Teachers Section 2008-09.

10.00 > Do we make learning difficult?
